

# Number Guessing Game - Python Project

This is a beginner-friendly Python project where the player guesses a random number generated by the computer.

## Repository Name:

number-guessing-game

## Description:

A basic Python game where the user guesses a random number.

## Python Code:

```
import random

number = random.randint(1, 10)

print("Welcome to Number Guessing Game")
print("Guess a number between 1 and 10")

guess = int(input("Enter your guess: "))

if guess == number:
    print("Congratulations! You guessed correctly.")
else:
    print("Wrong guess!")
    print("The correct number was:", number)
```
